(54) Title: DISTRIBUTION OF A BROADCAST PROGRAM

(57) Abstract: A system for wireless distribution of a broadcast program within a building comprises a distribution apparatus (110) for transmitting the program and at least one program receiving apparatus (160) for receiving the broadcast program. The program receiving apparatus may receive the broadcast program from a neighbouring distribution apparatus (210) when the distribution capacity of the home distribution apparatus is fully loaded with other programs. A program receiving apparatus receiving from a neighbouring distribution apparatus may discontinue that reception when the broadcast program can be made available from its home distribution apparatus, or when the distribution capacity is required for a neighbouring program receiving apparatus for a different program.
